## Hidden Shoal Recordings » New Releases

**Perth, Western Australia, July 18th, 2006.**  
**The Western Australian music label, Hidden Shoal Recordings, has released a new EP by Toby Richardson.**

“Golden Days” is a 6 track lo-fi rock opus from ex Mustang guitarist Toby Richardson. With all the playful charm of Robert Pollard and the wiry choreography of Pavement, this EP removes all pretension and carves it’s own special shape into the indie rock landscape. “Golden Days” features the crackerjack single, “It Makes the Air Sound Better”. The EP is available now from the HSR Store.

In other label news, Hidden Shoal Recordings has recently signed a distribution deal which will see it’s entire catalogue distributed by iTunes globally. The full catalogue should be available in iTunes stores mid to late August.

Hidden Shoal Recordings active release schedule will see a range of new albums, ep’s and singles coming out over the coming months including work by some new international signings.

The label’s music ranges from experimental ambient work through to shoegazing pop, post rock and all the good things that happen in between.

The labels current list of artists include some of Perth’s hidden treasures whose previous projects

include celebrated Perth bands such as Mustang, Resin, Lake Disappointment, The Neptunes, The Fur Versions and ambient pioneers Enargeia.
